## Technology

FlightScope was the world's first 3D Phased Array Tracking Radar for golf and has the most experience in the design, manufacture and worldwide support of this type of equipment.

FlightScope comprises a high performance, low power 3D Doppler tracking radar with phased array antenna technology and advanced ballistic flight analysis software to track a golf ball for its entire trajectory and club through and after impact. It represents the state of the art in golf measurement technology.

FlightScope X-Series is higher performance radar units with improved tracking capability and accuracy, especially on club delivery and unsurpassed measurement capability on grass.

## The Principles of the 3D Doppler Tracking Radar

## FlightScope in retail, club & ball fitting, and instruction

FlightScope has proven success as an aid to golf retail, club fitting and golf instruction. An investment in FlightScope is recovered in at most a few months through increased sales, better sales process efficiency, and return customers.

## Benefits of FlightScope

- State of the art club and ball measurement, using 3D Doppler tracking technology.
- Flexible all weather radar for both outdoor and indoor use.
- Comprehensive set of measurements.
- Other utilities and views for club selection, club fitting, and golf instruction.
- Much lower cost to purchase and operate than other 3D Doppler tracking monitors or golf simulators
- Reliable and consistent. Works all the time. Quiet operation, with no blinding light flashes. Does not miss shots easily. No adjustments needed after installation. Almost no maintenance needed. Highly reliable – nothing can wear out. Easy to add future software updates.

## FlightScope Models

### FlightScope X2

*Designed for Teaching Instructors who want it all:*

ALL Ball, Club & D-Plane Data

Self-leveling

Alignment Camera

Wi-Fi enabled

USB interface (to PC)

The FlightScope X2 Unit comes with Carry Case, AC Power Cord, Power Supply Unit, USB Cable (15'), Latest PC Software CD, Quick Start Guide, User Manual, FlightScope Mobile App Manual, Metallic stickers for indoor spin measurements. Used with FlightScope, VX2, X2 Skills Apps. And PC software with Simulator capabilities.

### FlightScope Xi+

*Designed for Club Fitters and Instructors looking for limited Ball and Club Data.*

Limited Ball & Club Data, No D-Plane information

Self-leveling

Wi-Fi enabled

The FlightScope Xi+ Unit comes with Carrying Case, AC Power Cord, Power Supply, USB Cable for support, User Manual, Metallic stickers for indoor spin measurements. Used with FlightScope Xi+ and X+ Skills Apps ONLY.

### FlightScope Xi

*Designed for the consumer looking for fun while improving their golf game*

Very Limited Ball & Club Data, No D-Plane information

Self-leveling

Wi-Fi enabled

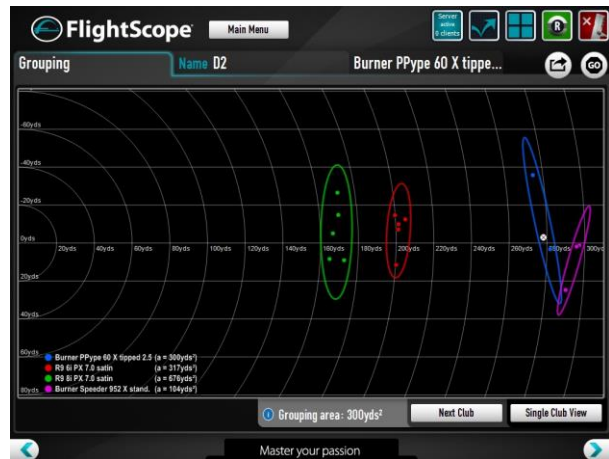

The FlightScope Xi Unit comes with Carrying Case, AC Power Cord, Power Supply, USB Cable for support, User Manual, Metallic stickers for indoor spin measurements. Used with FlightScope Xi Skills Apps ONLY

## FlightScope PC Screens

### Real-time Trajectory

### Grouping

### Club Analysis

### Club Analysis

### Driver Optimizer

### Skills Assessment

## FlightScope Mobile Apps (FlightScope, VX2, Xi+, X2 Skills, Xi Skills)

FlightScope connects directly to any Apple or Android mobile device via Wi-Fi, without the use of a PC. Connect up to 5 mobile devices simultaneously.

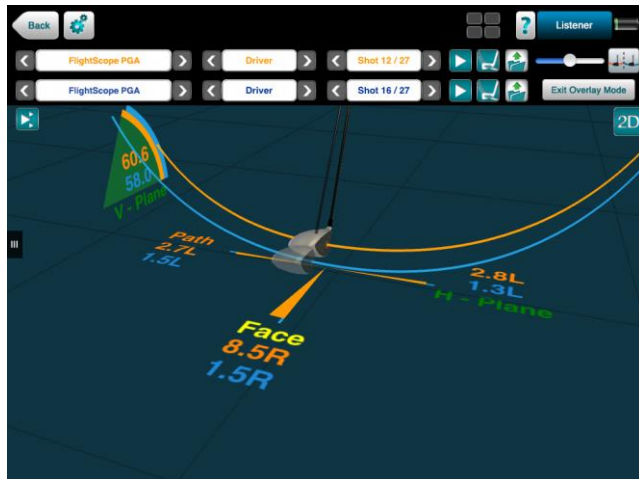

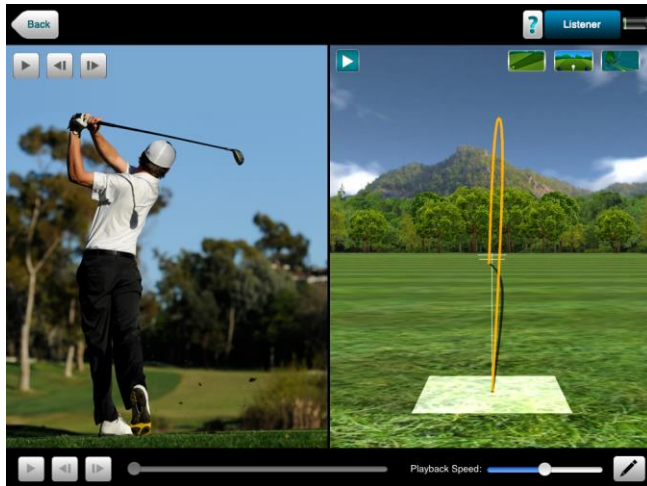

## FlightScope VX2 App

FlightScope VX2 App for side-by-side video and club or ball data comparison

3D animated club and ball display

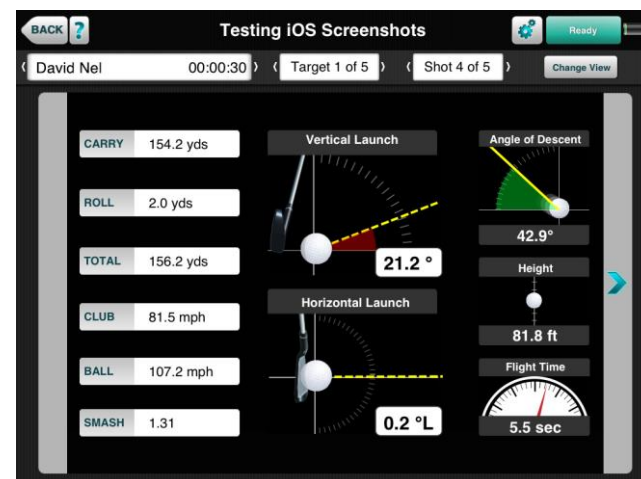

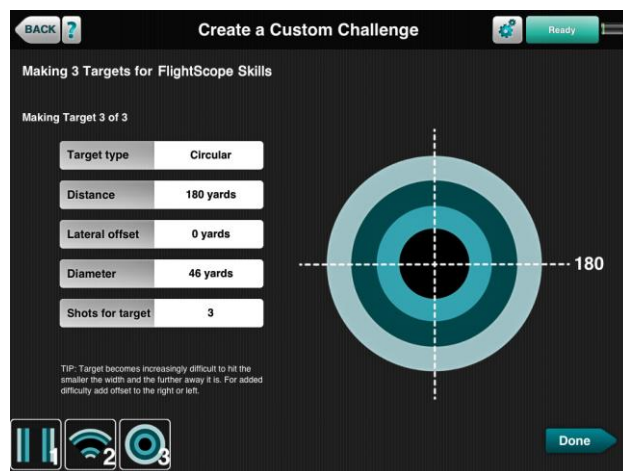

Price: \$49

## FlightScope Skills App

Bechmark your student with standardized tests. Create challenges with custom targets. Instant feedback on club and ball data. Let students have fun while testing their skills and improve their game. Publish own custom Skills challenges on **MyFlightScope.com**

Price: \$10

## **Annual Support and Software Upgrade Agreement (OPTIONAL)**

FlightScope offers an optional annual service agreement which includes Technical Support and Software Upgrades.

### **Technical Support**

The annual agreement covers support for hardware and software, including repairs and application consulting.

- Technical Support : Email and telephone based support is available 6 days a week from 8am EST to 5pm PST. Support engineer will use "Team Viewer" remote diagnostic facility when necessary.
- Swapping out of hardware is available to minimize downtime in the case of a repair.
- Factory warranty is extended for the period of the agreement
- Application training is included: 1-2 hours telephone based training

***With its marketing and sales HQ in Orlando Florida, turnaround time for repairs and support are unparalleled and minimum wait time required for customers.***

#### Call Out Technical Support

Call out service to customer site: \$200 PLUS Travel & Accommodation expenses.

#### When no Annual Support Agreement exists

Without an agreement, customer can still receive telephone or email support and can enter an annual agreement at any time and receive immediate benefits of the applicable support agreement.

### **Software Upgrades**

The annual agreement supplies the user with on-going access to future FlightScope software releases with new features and functions that become available as the technology progresses.

Two updates per year are guaranteed.

Supply of new releases of FlightScope software with new features and functions added through technology improvements.

#### Supply method

The FlightScope technical support team will email the customer a download link for the new software.

#### When no Support Agreement exists

Without an agreement, a user can still purchase Software Upgrades at a price of \$399 per release.
