

**3D SWING ANALYSIS. MADE SIMPLE.
SEE IT, FEEL IT, LEARN IT.**

Minimal Computer Specifications

Intel-based Personal Computer System with the following minimal characteristics :

- CPU: Intel CORE I5 or I7.
- Operating system: Microsoft Windows 7. (32 and 64 bits versions.)
- Disk Space : Less than 1GB, depending on pre-installed software (DirectX, etc.)
- NVidia graphic card. The model should be above GeForce GT430 in the 4xx series, above 530 in the 5xx series, above 630 in the 6xx series. Other brands may work as well. ATI graphic card models above AMD Radeon HD 6770M (sometimes also called ATI Mobility Radeon HD 6770) work. However, Guru will not support any customer that have issues related to a NON-NVIDIA graphic card.
- Sound Card. Needs a in-built speaker or a headset connected.
- One USB 2.0 port. Camera will not work on USB 3.0. How do I know it is a USB 2 or a USB 3 port? It is difficult to tell, but currently, most USB 3 ports exhibit have a blue stripe, but is it not a proven rule. Check the model of your computer on Internet to be sure of.
- Screen resolution must be minimum 1280*720.

Do not hesitate to contact your area reseller or our Support Team : support@guruts.com to receive the confirmation over the compatibility of your computer. Bear in mind that Guru's HQ is located in Brussels, GMT+1.
